Floors with character

Floors are ultimate mood-setters in the home and create not only the foundations of interior design, but the right atmosphere as well. An ambience that reflects the people who live there and their way of life. With its LVT floors, Therdex focuses on ease of use in the form of durable, hard-wearing materials that appeal to people's senses. LVT stands for Luxury Vinyl Tiles, flooring that cannot be distinguished from the real thing despite its artificiality. With their natural and luxurious look and feel, Therdex LVT floors are guaranteed to provide a lifetime of comfort and joy.

CONTACT

THE 5 ADVANTAGES

LVT floors are widely applicable, long lasting and produce minimal noise. Therdex would gladly help you in making your choice and with the maintenance of your floor.

INDISTINGUISHABLE FROM THE REAL THING

When you choose Therdex, you choose a floor with a natural look. The entire collection is embossed to match. This means that the structure is visible and tangible. This makes the floors indistinguishable from the real thing.

ALWAYS AVAILABLE IN MULTIPLE VARIATIONS

The entire collection is available in multiple variations. Because the designs are available in various sizes, they can be perfectly combined, therefore providing you with exceptional design opportunities.

PHTHALATE FREE THROUGH ORGANIC PLASTICISERS

Therdex uses responsible and biodegradable soybean oil-based plasticizers, whom make the material elastic and flexible. They are harmless to humans and the environment and are also biodegradable. This is important to you, to us and to the environment.

EASY TO MAINTAIN AND STREAK FREE

All Therdex LVT floors consist of four layers. The top layers protect the floor from heavy use, are scratch resistant and prevent streaking. This combination provides an easy-to-maintain floor; simplicity and convenience.

FREE AND NO-OBLIGATION SAMPLE SERVICE

Discover the colours of a Therdex LVT floor and experience its natural feel with our free samples. Samples can be ordered from our website entirely free of charge and without obligation. We are happy to help you make the right choice.

CREATE AND COMBINE

Create endless possibilities with Therdex LVT floors. The format of the herringbone and chevron planks allows for creativity. Finish the room with a border (optional with piping). This finish looks classic and gives an exclusive effect. Combine your own design and identity.

WHAT IS LVT?

LVT stands for Luxury Vinyl Tiles. It is a hard and brittle product and is based on petroleum (43%) and salt (57%). Adding plasticizers makes the LVT flexible. It is strong and lightweight. It can also be easily recycled, as it can be processed in many different ways.

Therdex LVT floors have true-to-life patterns and are available in herringbone, long planks, chevron and tiles. All our products consist of 4 layers, namely: the PU layer, the wear layer, the film layer and the LVT backing.

The PU layer gives the plank extra protection and ensures the right mattness of LVT. The wear layer protects the floor from intensive use and makes it scratch-resistant. The film layer is the floor's print. It reveals the colour and structure of the floor. The LVT backing is the lowest part of the floor. This backing provides the strength of the floor and the right sound absorption.

DRYBACK

Dryback LVT is a bonded floor. This bonded floor is sound dampening and very maintenance friendly. A leveled subfloor is very important for installing a dryback floor. Dryback is suitable for intensive domestic use, but also for project applications.

Dryback features

-  no subfloor required
-  sound reducing
-  water-resistant
-  suitable for underfloor heating and cooling

RIGID CLICK

Rigid Click is a smart mounting solution and eliminates the need for glue. The planks or tiles are easily clicked together with a reliable Uniclic click system.

Rigid Click features

-  very easy to lay
-  great ease of use
-  suitable for intensive use
-  powerful Uniclic system
-  reduced impact noise
-  moisture-resistant

SUSTAINABILITY

The floor is one of the most image-defining factors in the interior. There are many factors involved in making the right choice. When you opt for a Therdex LVT floor, you are getting a top product in all respects in which sustainability plays a major role.

What is LVT?

LVT is a hard and brittle product based on petroleum (43%) and salt (57%). Therdex LVT floors are made flexible by the addition of bio-plasticizers. This results in a light, strong and, above all, durable LVT floor.

How sustainable is LVT?

By choosing an LVT floor, you will have a strong and stylish floor that will last a long time. In that respect, an LVT floor is therefore very durable. At Therdex, we make exclusive use of safe bio-plasticizers. These are made from sustainable soybean oil, which makes them biodegradable and harmless to people and the environment.

Delivering a top-notch product also involves caring for the environment. The environment belongs to us all. We should treat it with care. This is why we place great importance on testing and approving our products. Naturally, our products comply with the mandatory labels, but in addition, we have nonmandatory tests carried out on our products at other test centres.

HEALTH PRODUCT DECLARATION COLLABORATIVE

HPDC is an independent body that provides a record of the content of the materials. Through HPD, production reports what products are used and what risks consumers should be aware of. Therdex is in possession of 'The Health Product Declaration'.

LEADER IN ENERGY AND ENVIRONMENTAL DESIGN

LEED stands for green buildings with the best building strategies. When building projects adequately meet the conditions, they are eligible for LEED certificates. Therdex is FloorScore, EPD and HPD certified. This means that by using Therdex floors in architectural and design projects, one can qualify for LEED.

INDOOR AIR COMFORT GOLD

By meeting all requirements, a company creates a healthy indoor environment. This is what the Eurofins label stands for. Our floors meet the highest health and product standards, following criteria of world-leading building organisations such as: agBB, VOC emission class A, BREEAM Internat. Factory inspections are in accordance with DIN 18200, the VOC test in accordance with EN 16516 and the ISO 16000 series.

ENVIRONMENTAL PRODUCT DECLARATION (EPD)

EPD is a comprehensive report, which details how a product affects the environment during its life cycle. The SPD is in accordance with the standards developed by ISO. All Therdex floors are third-party verified for UL Environment EPDs.

FLOORSCORE

FloorScore tests and certifies all hard floors and floor adhesives. They ensure that the products meet the requirements for indoor air quality emissions. All Therdex floors are FloorScore certified for low VOC (Volatile Organic Compounds).

BREEAM

BREEAM is an international standard for rating buildings on sustainability and energy efficiency. Our Therdex floors can be applied to BREEAM new construction and existing buildings.

ECO+ PHTHALATE-FREE BIO-BASED CONTENT

Therdex uses an organic plasticiser based on soybean oil. This is a phthalate substitute. As a result, Therdex does not use phthalates and has therefore been awarded the Eco+ phthalate-free certificate.

ISO 9001 certified

ISO 9001

The ISO 9001 standard is an internationally recognised standard in the field of quality management. The standard provides guidelines to good quality management and specifies what a good system should meet.

ISO 14001 certified

ISO 4001

The ISO 4001 standard consists of internationally accepted requirements for an environmental management system. The environmental management system is used to develop an appropriate environmental policy for an organisation.

AVAILABLE IN THREE VARIANTS

NEW! PREMIER SERIES

Stylish floors with an ultra-matt effect

SUPER MATT

The floor has a matte finish, which provides a contemporary look.

KNOT-FREE DESIGN

The name Premier is due to the knot-free design, like the best wood floors.

Check out the new Premier series on page 38.

COLLECTION STRUCTURE

Whether you choose long planks, chevron, tiles or herringbone; all our floors are available in various sizes and colours. Therdex believes in the dynamics of unity and simplicity. Combine and create endless possibilities with the floors from Therdex.

BASIC SERIES

4270

Luxurious and sustainable; this is what characterises the Basic series. The perfect foundation for any interior, due to the quiet design of this rustic oak floor. Available in planks of 2 mm thick.

THERDEX MODULAR

Loose Lay and Rigid Click floors

A SMART SOLUTION

A floor offers years of comfort. The focus with Therdex is on user convenience, which already starts when laying the floor.

Therdex Rigid Click floors are very easy to install, and eliminates the need for adhesives thanks to a reliable Uniclic system.

Our Loose Lay floors offer convenience and comfort through the quick and easy way of laying. Because of their weight, the planks and tiles are laid loose.

Therdex Modular floors are thus reusable, easy to (dis)assemble and replace. This makes Therdex valued among architects, designers and interior lovers looking for a distinctive and durable for project floors.

LOOSE LAY

LL5051

Loose Lay offers quick, convenient installation due to its weight, allowing for loose laying of the boards and tiles. The durable LVT ensures longevity, making it perfect for commercial projects. Loose Lay floors feature a sleek matte finish for a modern touch.

Type	Loose Lay
Embossing	universal embossed
Dimension	tiles 50x50 cm
Content	8 pcs. 2 m ²

FACTS

- very easy to install
- no use of adhesives required
- suitable for heavy-duty use
- ideal for project purposes
- non-slip underlayer
- easy dismantling
- easy to use
- reduced impact sound
- moisture-resistant
- scratch-resistant
- maintenance-friendly
- prevents stripping
