### CE MARKING

EN 14041

Areas of use: domestic use

#### HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission
- No glue
- GFT backing: > 95% recycled fibres

#### ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning

Laying video

## LAYING

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:

The subfloor must be smooth, hard, dry and clean.

Unroll the floor covering 24 hours before it is due to be installed.

The floor covering should not be laid in rooms where the temperature is below 15°C.

Although Texline is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.

Can be installed on underfloor heating (up to 28°C).

Cold-weld the joints for perfect water-tightness.

**Thanks to its special patented composition, Texline can be laid directly on most existing subfloors using loose laying.**

### SUBFLOOR PREPARATION:

**On wooden floorboards and on ceramic tiles:** Texline can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:

- up to 5 mm wide and a maximum depth of 1 mm in existing tiling
- up to 3 mm wide in wood flooring.

**On textile carpeting (felt or needle punch):** Texline can be installed directly over the existing carpeting as it has excellent resistance to indentation.

**On concrete:** Texline can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room.

A rough concrete surface should be treated with a smoothing compound beforehand.

### INSTALLATION:

**Loose laying:** Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

**Permanent laying:** Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250g/sqm) and a finely notched trowel and cold weld the joints.

## CLEANING & CARE

**Initial cleaning:** Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

**Maintenance:** Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

**Cleaning:** Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

**Discoloration:** Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

# texline

## UNROLL... IT'S DONE!

**Economical, quick and easy to lay**

- No subfloor preparation
- No glue

### Saves extra costs

## TEXLINE, COMFORTABLE UNDERFOOT

- Sound insulated
- Warmth underfoot

## TEXLINE, ALL USES FLOOR

**Waterproof: ideal for wet rooms**

- bathroom, kitchen

**Resistant: high traffic rooms**

- living room, corridor

**Easy to clean & hygienic**

- living room, kids' bedroom
